Biker Coat/Helmet Rack "Single", order no. 10014325

This sturdy, adjustable biker coat/helmet rack is ideal for hanging up your motorcycle leathers or other items of clothing, and bunches of keys. To ensure it gives you long service, you should observe the following points for correct installation:

The rack must be installed on a sound wall, a solid wood board or an item of furniture that is stable enough to take the weight of the rack plus clothing. The surface you choose must allow the screws to be securely fixed.

For installation on a masonry wall, use suitable screws and wall plugs. Certain types of wall, e.g. cavity walls, require special plugs. Use wood screws for mounting the rack on a wood board or item of furniture. Never use nails.

1. Mark out the screw holes with the required spacing on the surface using the base of the coat/helmet rack as a template. Use a spirit level to ensure that the upper holes you have marked are exactly horizontal. Then drill the holes. When using wall plugs, follow the plug manufacturer's instructions.

2. Once you have screwed the base of the coat/helmet rack securely to the surface, attach the first arm segment, with the hanging loops pointing downwards, to the base using the M8 bolts supplied.

3. Then screw the second segment to the first.

4. Finally, attach the helmet shelf to the second segment. Use two washers for each bolt (one under the bolt head, and one under the nut).

Tighten the nuts in such a way that you can still adjust the arms. Arrange the coat/helmet rack in a way that is most convenient for you and your clothing before tightening the bolts fully so that they do not give with the weight of heavy motorbike clothing, and the arm segments stay in the position you have chosen.

Do not overload the coat/helmet rack – always consider how much weight the surface on which you have installed the rack is able to carry.

Please contact our technics centre via the fax number (040) 734 195-58 resp. by email: technikcenter@louis.de before using the article for the first time, if you have any questions on the product and/or these instructions. We will be happy to provide you with quick help. In this way, together we guarantee that the product is correctly assembled and used without any problems.
