

SETTING YOUR PERSONAL COMBINATION

Your new resettable combination padlock is preset at 0-0-0. (Even though dials may appear in other numbers).

To reset the combination:

Step 1

Leave the dials at preset combination 0-0-0 and pull out the shackle.

Step 2

Turn the shackle counterclockwise to 90° and press down all the way.

Step 3

Keep holding the shackle and set the dials to your own desired combination. (Do not open, let go of the shackle while setting the dials.)

Step 4

Release the shackle and return to its original position. Your lock is now ready to open at your own personal combination.
