

T&T Analog Clock | Order no. 10034780/1/2/3

**Dear Customer,
Thank you for choosing our product.
Please use these instructions when fitting
it to your motorcycle. The Louis Team
wishes you lots of fun.**

This small clock can be fitted to the cockpit area of your motorcycle or car, or on other flat surfaces. The extremely strong hook-and-loop adhesive pad allows it to be removed again whenever required. You should ensure that the surface is clean, dry and free of grease.

The clock can also be mounted on motorcycle handlebars with a diameter of 22 mm or 25.4 mm, using special single

or double brackets with a housing (Order nos. 10034515 and 10034518). In this case, the clock must be removed from the housing in order to set the time.

The quartz movement is powered by a single button cell SR626SW. To replace the battery, simply unscrew the base of the clock. Then remove the battery carefully and fit a new one. After changing the battery, screw the cover back on.

As a general rule, we recommend taking the clock to a watchmaker or jeweller to have the battery changed, as this will ensure that your clock remains waterproof and fully functional in the long term.

If you have any questions about the product or these instructions, please contact our Technical Centre by fax on 0049 (0)40 734 193-58 or by e-mail at: technikcenter@louis.de before you install or use the product. We will be pleased to provide prompt assistance. This is the best way to ensure that your product is installed properly and used correctly.
