

Sun shield for the following helmet models

Probiker® PR2/R SX4/Demi-Jet Fiber 2/Demi-Jet Fiber 2 LED

Dear Customer, Thank you for placing your trust in our product.

Please use these instructions when changing the sun shield. The Louis Team wishes you lots of fun.

Changing the sun shield

The sun shield can be changed without the use of tools. However, be sure to place your helmet on a soft, non-slip surface while you work to prevent it from getting scratched or otherwise damaged.

If you have any difficulties or questions while changing the shield, stop working on the helmet or shield before it gets damaged. Consult the vendor or the Louis Technical Centre by fax on +49 (0) 40 734 193 58 or by e-mail for reliable advice: technikcenter@louis.de. That way, you can help Louis help you ensure that your shield is changed properly.

1. Flip up the visor fully and flip down the sun shield with the lever on the left-hand side of the helmet (Fig. 1)
2. Pull one side of the sun shield down a little to create a small gap between it and the upper edge (Fig. 2) and press it out of its mechanism from the inside out (Fig. 3)
Note its position when mounted. Repeat these steps for the other side to enable you to take out the sun shield completely.

3. Insert the new sun shield into the gap on the right and left and push the right-hand side of the shield into the mechanism until it engages with an audible click (Fig. 4). The left side should automatically sit into the guide.

Replacement is now complete. Check that the sun shield flips up and down reliably before you use your helmet again.
